About This Game

Coldfall is a short puzzle/exploration sidescroller game set during the Cold War.

Play as a British reporter who has been sent to the (almost) abandoned remote town of Coldfall, which is about to be used for nuclear strike tests. After your car breaks down upon arrival, you immediately find that radiation from other test sites have plagued the town with mutants of the past inhabitants.

Explore the town and collect weapons, ammunition and other items while attempting to get off the island before the next nuclear strike hits.

Pay attention to your surroundings, always! Keep in mind this game is a one-shot straight play-through: there is no saving. If you die, you must restart from the beginning, so be careful!

Unfortunately, sneaking around these outlaws won't be an option this time; the trail is bordered by woodland for miles, and a quick glance at the undergrowth reveals a few booby traps; who knows how many more there are waiting for you? In the likely event of a fight, you need to decide on how to handle these villains.

- There's just one option, to your mind - you'll slaughter these fools.
- Trying to force this group into a bargain seems like a plausible course, and they might be handy allies later.
- It would be best to incarcerate these bandits; that's your job, after all; not to mention that's the quickest way to getting your bounty.
